***** GENERAL MESSAGE TO ALL GALILEO USERS *****

GSAT0220 ANOMALOUS BEHAVIOUR

On 19 February 2023 at 21:54 UTC, one of the satellites of the Galileo constellation (GSAT0220) experienced an anomaly on the broadcast of its signal in the E1 frequency band. In line with the normal procedures, the broadcast from this satellite was interrupted by the operator (please refer to NAGU [2023010](#)) and will remain so for the duration of the anomaly investigations. Further information will be communicated once the source of the anomaly and the course to signal recovery have been determined.

The Galileo constellation minimum service performance is not affected by this situation.
